

VITAWORK®

# VITAWORK® THE BEST LIGHT FOR WORKPLACES.

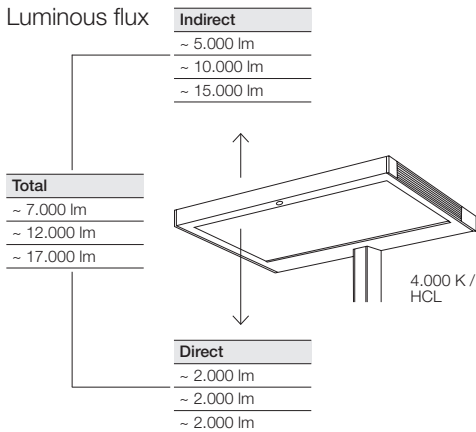

**Designed to suit every room setting.**

With its focus on the quality of the light, the appearance has deliberately done away with superfluous elements. The clean lines fit perfectly into interiors of every style and give them added value. All materials used underline the high quality standard and can be recycled.

In addition to a broad range of standard products, customised products for specific projects are also available.

## Even lighting for rooms of every size.

VITAWORK® is available with three different luminous flux intensities which can light rooms of different size. The colour temperature of 4,000 K with a colour rendering index of CRI >80 provides optimal working light. The combination of direct and indirect illumination creates a feeling of natural light and provides particularly even illumination.

State-of-the-art LEDs provide either symmetrical or asymmetrical light distribution via a light panel.

VITAWORK® is suitable for complete illumination of larger and more spacious offices - depending on the application, it will also fulfill the requirements of the EN 12461-1 standard and the German ASR compliance. When developing this range, we placed special emphasis on energy efficiency (approx. 135 lm/W).

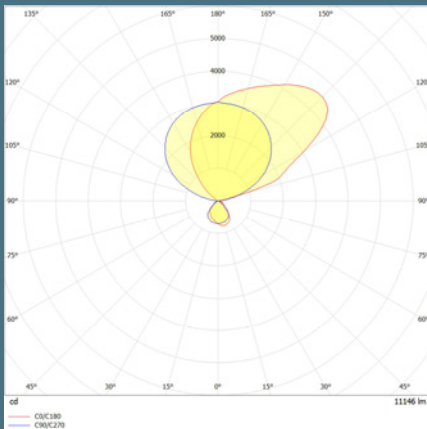

A variant with biologically effective lighting (2,700–6,500 K) completes the product range.

## Visual comfort:

### See well thanks to individual adjustment of the direct and indirect component

- Direct/indirect distribution for a natural light impression and even illumination
- Lighting individual areas and different tasks in one design
  - 7,000 lumen: Open Space
  - 12,000 lumen: Offices with single and double work stations (approx. 16 m<sup>2</sup>)
  - 17,000 lumen: Large rooms, exposed concrete ceilings, special requirements
- Ideal for height-adjustable tables
- Automatic control via light intensity and presence sensors

## Light Distribution

DIN EN 12464-1

ASR 3.4

Technical data valid from august 2018

Please check our website for actual technical informations.

All lamps are available with symmetrical and asymmetrical light distribution.

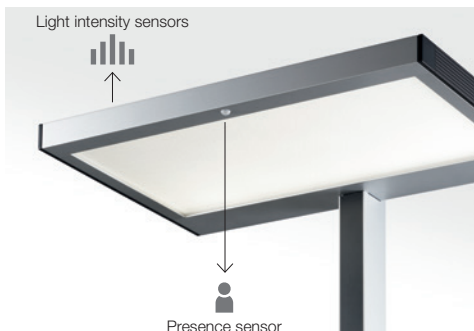

# OPERATION AND SENSORS

**Sophisticated technology that's easy to operate.**

At the core of all LUCTRA® lamps is the patented VITACORE® electronic system. It helps provide the best quality of light, and its operation is so simple.

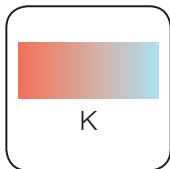

VITAWORK® comes with a pleasantly unobtrusive touch panel. In addition to the on/off function, separate stepless dimming of both the direct and indirect light is possible. If desired, the floor lamp can also be controlled via a presence or light intensity sensor.

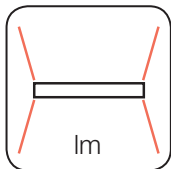

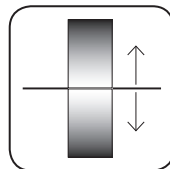

# VITAWORK® CAN BE CUSTOMISED TO YOUR PROJECT

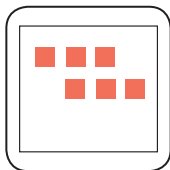

Biological  
lighting effect/  
project-specific  
colour  
temperature

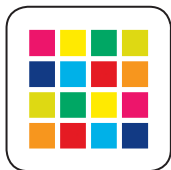

Customised  
luminous flux/  
adjustable  
lighting  
sequence curve

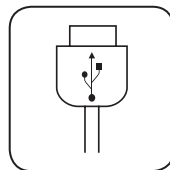

Joint direct/  
indirect  
dimming

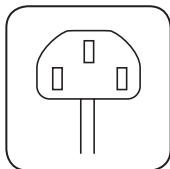

Light networking/  
integration into  
building

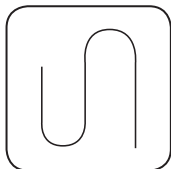

Your choice of  
colour

USB charging  
ports

Kettle  
plug

Customised  
cable length and  
easy exchange of  
cables

## ABOUT LUCTRA®

LUCTRA® has set out to provide the best possible light for working: innovative, inspiring, reliable, sustainable. Light which not only illuminates, but also makes its users more contented, less tired and perhaps even a little more successful. This works because it gives the right impulses for every situation, perfectly in line with the user's taste.

The biological effect of LUCTRA® light was proven in a clinical study.

All LUCTRA® lamps are developed and assembled manually in Germany.

See [www.luctra.eu](http://www.luctra.eu) for further details about our project support, other products and our team.
